Police Stamp Down on using a Mobile Phone whilst Driving !

The Government has decided to crack down on drivers using mobile phones. The old on the spot fine of £30 will be doubled to a £60 fine plus 3 points on your licence. At **Install Technologies** we can provide you with everything you need to stay on the right side of the Law whilst keeping in contact with your colleagues, friends and family.

Business communications

Install Technologies offer business solutions from all the major networks.

Vodafone Sharetime tariffs include minutes to landlines and other mobile networks, & calls to your company mobiles are free up to 60 minutes per call.

Orange offer a range of business tariffs from 120 minutes to 50,000 minutes. A wide range of handsets and tariff packages are available.

O2 include a range of handsets and tariff packages to best suit your needs. We offer line rental from as little as £11.91 per month (minimum 2 users).

Call Install Technologies for further information and free billing analysis to match the best network and package for you and your business.

Fixed Line Phone Systems

We can offer **fixed line phone systems** and complete office solutions, from small to large, and from simple extensions to full networks.

* Working in partnership with DP Solutions.

Mobile Data

BlackBerry™ is a pocket-sized wireless solution giving you easy access to your email, company Intranet and the Internet.

You can send, receive, forward and reply to messages while on the move - your emails find you automatically, no dial up or waiting. BlackBerry™ also lets you open and view email attachments.

Using a Vodafone Mobile Connect **3G data card** is the smart, simple way to keep in touch when you're out of the office. You can access your emails, download large attachments, hook up to your company network or browse the web. Let us show you how to make technology work for you.

NAVMAN wireless

Imagine being able to track the movements of every vehicle in your fleet, in real time and access historical activity information.

All this is easy with Navman's effective and affordable GPS vehicle tracking and reporting system, designed to help you increase productivity, improve efficiency and reduce costs.

Navman's vehicle tracking systems let you:

- Search for locations and quickly allocate a job to the closest vehicle.
- Identity driver compliance with company operating standards, including speed and working hours.
- Set benchmarks for driver behaviour and vehicle work rate during business hours and ensure resources are properly allocated.
- Set parameters for unauthorised vehicle use and instantly receive alerts via email SMS text to mobile phone and/or pop up box on the screen when breached.
- Manage a fleet via the internet from the office, home, or on the road.

Enjoy fast, efficient and cost-effective two way messaging between the office and vehicle using Mobile Messaging from Navman.

Key functions and features of Mobile Messaging:

- Dispatch complete job details, directions and messages.
- Allow fast replies via prepared responses and variable fields from the vehicle (e.g. Job accepted *20* minutes away).
- Enjoy incredibly low-cost messaging. Communicate with your field staff at less cost than a phone call or SMS to a mobile phone.
- Send a message to one, some or all the vehicles in the fleet.
- Receive automatic confirmation that messages have been received, ensuring jobs don't get lost.

Mobile Messaging and Navigation is Navman's market-leading fully integrated job dispatch and satellite navigation system. It brings together two-way messaging and GPS navigation technology.
